

# RTH Digital Consulting

What is the **Covid-19 Recovery Rate**? Why is it different among Countries? What are the similarities? What are the delays & defects? Are shutdowns reasonable? Are Recovery Rates influencing our economy going forward? To what degree? What impact will a vaccine assure us? When? These questions need answering.

**RTH Digital Consulting** is a private Consultancy tracking Covid-19 Recovery in 10+ different Countries. The study records data points twice a day from sources deemed reliable but not guaranteed. After data tracking, charts and graphs present the compiled data in summary form and breakouts for each Country. Now a 130+ day study, it is available in a 30+ page **digital full color pdf** for analysis and discussion and includes the following:

- Defined Recovery Rate assumptions
- Countries included:
  - Australia
  - China
  - France
  - Germany
  - Iran
